LIT Topic: Remote Court Trends in Different Regions

Post-pandemic, some courts are maintaining remote environments for hearings and trials. Let's discuss remote court trends, appearances or otherwise, in the different regions where your firm practices.

Do you find you have to track court information that would not ordinarily fall under a docketing umbrella (such as court closures, court requirements for masks, vaccinations, etc.) due to post-pandemic remote/hybrid court environments? If so, how do you handle tracking and disseminating this information?

How do you handle remote hearing login information? Is it the Docketing Department's responsibility to track connection details for the case teams or is this handled by other firm personnel (secretaries, paralegals, etc.)?

What other kinds of remote court trends are you seeing, handling, docketing beside appearances?
